Lanternglass Learning: price against what was bought, and whether it holds (3 February 2026)

Sample read: the company is a sample and the figures are illustrative; the method, the sources and the marks are as shipped. Legend: ✅ cited; 🟡 inferred; ❔ unknown.

The answer in one paragraph

Lanternglass is a listed school-software company whose growth since 2023 is two acquisitions, not its own product. The filings show it paid 2.1x revenue for a profitable assessment business and 9x for a loss-making tutoring marketplace, and the job boards show it is building on the second and running down the first. The three-year case rests on whether the tutoring marketplace reaches the margin the CEO has guided to; the signals to watch are two earnings calls and one earn-out cliff.

	Quizzenby Ltd (2023)	Tuttlewick (2025)
Price and structure	GBP 19m, cash ✅ [FY2023 annual report]	GBP 135m, 40% shares, earn-out to 2027 ✅ [FY2025 annual report]
Trailing revenue, multiple	GBP 9m, 2.1x ✅	GBP 15m, 9x ✅
Profitability at sale	Profitable ✅	Loss-making, "path to breakeven in FY2027" ✅ [deal call]
Goodwill share	48% ✅	81% ✅
What was done with it	Brand retired Mar 2025; product folded into Lanternglass Assess ✅	Brand kept; 11 of 23 open engineering roles are Tuttlewick ✅ [board, 3 Feb 2026]

Says versus does

Said	Done
"Quizzenby customers will see continuity" (2023) ✅	Quizzenby domain redirects; three one-star reviews cite forced migration ✅
"Tuttlewick breakeven by FY2027" (2025) ✅	Tuttlewick hiring up, marketing roles doubled; no margin data yet ❔

Outside view

Analyst split: two Buys on the tutoring market, one Sell on leverage after the Tuttlewick deal ✅. Regulatory: the schools-procurement framework renewal in 2027 is the gate for the assessment business 🟡.

Signals to watch, dated

Date	Event	What to look for
2026-03-12	FY2025 results	Tuttlewick segment margin, first disclosure
2026-09	H1 2026 results	Whether "breakeven FY2027" survives
2027-06	Tuttlewick earn-out end	Founder exits
