Pedalgrove position in UK e-bike subscriptions (21 November 2025)

Sample read: the company is a sample and the figures are illustrative; the method, the sources and the marks are as shipped. Legend: ✅ cited; 🟡 inferred; ❔ unknown.

The answer in one paragraph

Pedalgrove is second of four by fleet size and first by city coverage, and its moat is the repair network, not the bikes: the only intangible it has ever booked is "service partner agreements" ✅ [FY2024 accounts]. The leader, Velothane, is bigger on fleet and cheaper per month but is hiring for a repair network it does not yet have ✅ [12 of 30 open roles]. The ranking changes if Velothane's repair hiring lands or if the Transport for London grant scheme, which favours operators with in-house repair, is renewed in April 🟡.

Market map

Operator	Fleet 🟡	Cities	Price per month	Repair model	Marks
Velothane	~18,000	6	GBP 59	Contracted, building in-house ✅ [ads]	✅ press, 🟡 fleet
Pedalgrove	~11,000	14	GBP 69	Partner network, 120 shops ✅ [site]	✅
Spokesmith	~4,000	3	GBP 79	In-house ✅	🟡
Rimwarden	~2,500	2	GBP 49	None stated ❔	🟡

Says versus does

Velothane's CEO: "repair is a commodity" (podcast, Jun 2025) ✅. Velothane's board: twelve repair-technician and two "repair operations lead" roles since September ✅.

Three dated events that would change the ranking

1. 2026-04: TfL grant renewal terms published.
2. 2026-01: Velothane's Series C close, if it names a repair acquisition 🟡.
3. On filing: Pedalgrove FY2025 accounts, the first with a full year of the partner network.
